Game Development 

Reverse Engineering 

Full-Stack Web Dev 

AWS & Cloud Ops 

C# / Java / Python 

Unity / Roblox Studio 

LANGUAGE

- English - Native
- Spanish

SELECTED PROJECTS

2026

-

2025

ArsThread Expansion

Minecraft Forge 1.20.1 Mod | CurseForge

- Extended Ars Nouveau's thread system to all armor types with consistent slot management.
- Adopted as required dependency in modpacks totaling 1M+ downloads; 300k+ personal downloads.

Jump 'Till You Drop

Unity WebGL | GMTK Game jam 2025 | Theme: LOOP

- Placed top 20% out of 10,000+ entries globally in GMTK Game Jam 2025.
- Ranked ~400th place in the Narrative category out of all submissions.
- Built in Unity with WebGL export; playable in browser with no install required.
- Designed, developed, and shipped a complete game solo within the jam's 96-hour time limit.
- Demonstrated ability to build under constraints, iterate rapidly, and deliver a polished product.

Gradefolio

Free SaaS Web App | AWS Full-Stack

- Live SaaS web app for students to track grades, predict scores, and share progress via QR code.
- School email auth, tokenized parent access, assignment-level privacy controls, and JSON data export.
- Free forever, no paywalls deployed on AWS.

ACHIEVEMENTS

Capital One Coders

Capital One
Year: 2022-2023

Personal Finance Course

Knowledge Matters
Year: 2025-2026
